- Puppy Training
- Stud Service

## DOUBLE TT BRITISH KENNELS HEALTH GUARANTEE AND BILL OF SALE

Double TT British Kennels does not knowingly sell a sick puppy. We back up that policy with the guarantee that if you bring your puppy back within **7 days** of purchase with a written statement from for veterinarian that the puppy has a serious health problem, you will be given a complete refund of the purchase price of your puppy or a replacement Pup. Injury or accident after the purchase would be excluded as a reason for refund.

In addition to this immediate guarantee we offer a guarantee to the original purchaser against any ocular/vision defects and as well as a guarantee against elbow dysplasia, also, a conditional guarantee that your dog will be OFA Certifiable against Hip Dysplasia at the age of **twenty eight months**.

We at Double TT British Kennels breed only to those animals with low hip scores and do not knowingly include lines that have predisposition to Dysplasia. In order to honor this guarantee and to verify that any Hip Dysplasia is not the result of overwork, injury or obesity, we do require that we receive copies of all Vet statements, pictures and X-Rays in order to obtain a confirming opinion from our Vet. We will also need to receive confirmation from your Vet that the dog has been either euthanized or neutered/spayed. If it is determined that cause is a result of genetic defect and the dog does not get OFA Certification, it will be replaced with a puppy from the next available litter. There will be no cash refund unless there is no available puppy within one year. This guarantee would be voided if the dog had been bred or used as a stud.

We have found that the factors of obesity and overwork contribute as much to the development of hip dysplasia as can genetic factors. It is this experience and our overall concern for the health and welfare of every one of our Labs that we include feeding and nutritional recommendations in our Bill of Sale.

In order for your guarantee to be in effect, we will insert an AKC microchip into your pup. This is to insure your puppy's safety and your peace of mind. You must enroll your puppy with AKC Reunite Program with our Micro Chip number we give you. For more information, go to [akccar.org](http://akccar.org).
